Gunship Battle2 VR is a cheesy arcade style combat sim but I wanted something simple and cheesy. I have quite a few pro-level flight sims, which incorporate dozens of control parameters but I wanted something much simpler. Gunship 2 is a nice departure from all that mess, using a simple controller scheme with a joystick or gamepad. I use a HOTAS X and Xbox controller and was able to start flying within a few minutes after the options setup. The graphics are pretty good and the Oculus VR head tracking motion is excellent. It's no where near the level of MSFSX or DCS World but I think, Gunship Battle2 is just as much fun and well worth the money.. This is a reasonable game with average graphics but a poor control system. Using your head to turn a vehicle is wrong and awkward, painful and difficult. There is a joystick movement (right stick, left to right) that does nothing, yet you can only turn the helicopter by turning or twisting your head. No remapping of controls is allowed either. If they can fix these issues I would recommend it, but until they do I wont play it again. I want to play it again though, but just cant like the controls. May even refund. Its not a AAA title by any means, but for the money its ok.. this should be game of the year for vr flight games. Read the other review but still took a chance as its an inexpensive game, its OK apart from (as previously said) turning the helicopter, head steering is great for aiming and shooting but when I tried to return to the base - tilted head, my office chair rotated and I lost tracking as I was facing away from sensors, turned to face sensor and helicopter was heading in the wrong direction again, this should be an easy fix for the dev but until fixed cant recommend the game.. This game works very well,has loot and quite a few upgrades. There are a couple of flaws that I consider to be rather minor. All in all a pretty good VR shooter that is more on the casual side but still pretty fun to play. I think this game is well worth the asking price and I would hope to see more offerings from this developer.. not working in my laptop. lost of money this game is a s...
