

P3D v3.4.22.19868 hotfix is available for download, with a major update to the time rate adjustment system which should help address notable issues with how animation was occurring in certain situations. Plus, this release contains updates for other improvements and bug fixes too! Installing this free software hotfix will automatically correct any problems you are having with animations not playing properly, flight data files being corrupted, etc. We recommend you install the v3.4.22.19868 hotfix if you are currently running an earlier Prepar3D v3 version (such as 3.4.21 or earlier). Please review the following Knowledge Base article for more details about how to properly install this hotfix: <http://knowledge.prepar3d.com/kb/How-to-install-the-Hotfix---Prepar3D--119869.aspx> This download is available via our mirrors, or directly on the Microsoft Download Center here: <https://www.microsoft.com/en-us/download/details.aspx?id=56197> Please note: Your antivirus software may alert you because this download contains compressed files. This is normal. Please do not become alarmed because this is a common practice for Prepar3D hotfix releases.

Compatibility with other versions of Prepar3D v3:

Compatibility with other versions of Prepar3D v4:

We thank everyone for their patience and assure you that the team has been working diligently on these issues.

This free software hotfix should be applied to all versions of Prepar3D v3.4 hotfixes and not just v3.4.21 or earlier versions.

We recommend you install the v3.4.22.19868 hotfix if you are currently running an earlier Prepar3D v3 version (such as 3.4.21 or earlier).
